Ecology
2012 - 2013
#3

I. types of species

- A. native = have always existed in an area
- B. immigrant = are "new" to an area
- C. indicator = change quickly in response to change in environment
- D. keystone = actions lead to changes in many other species

II. Reproductive strategies

- A. "r" strategists = produce many offspring in a short period of time
 - 1. little parental care
 - 2. high mortality
 - 3. high fluctuations in population
- B. "k" strategists = produce fewer offspring
 - 1. intense parental care
 - 2. low mortality
 - 3. stable populations
